

Yunus Emre Altanay

Php Laravel Geliştirici

I have been involved in software and game development for four years. I have been taking a software course at Siliconmade Academy for the last year. I have completed the basic software training and I am about to finish the Full Stack Php Developer training. I want to move my career to the software industry, which was my childhood dream. That's why I want to devote everything to the company I'm in while learning with full dedication and devoting all my time to.
